# INTRODUCTION

The introduction is not counted in the word count[1] and this is a citation with page number, optional (Mishkin and Eakins p. 200). We can reference a figure (Fig. 1) and the number will be updated automatically. The ~ inserts a non breakable space.

If the citation is part of the context, you can use Hull p. 32 noted that . . . (the command ldots inserts the ellipses, that is three dots). Now I can reuse the initial reference without any issues. Mishkin and Eakins observed that . . . but if I use the same reference again it will omit the author name(s) p. 121 observed that . . . and you might need to manually adjust. If you have better advice, please let us know.
